

Information Technology Executive and trusted partner to senior management with a demonstrated ability of aligning business objectives, process and technology to deliver high impact initiatives that accelerate sustainable growth and profitability. Analytical thinker assesses organizational needs and introduces cutting-edge solutions that ignite revenues, increase productivity and optimize performance. Impeccable change leadership through numerous successful M&A integrations, turnarounds and transformations. Adept negotiator and skilled financial/project manager who builds and leads teams to exceed expectations within diverse stakeholder groups and environments. Select accomplishments:

- **Increased Profitability** – ~4,000+ servers to ~200; templates + tools slash setup and maintenance at Comcast.
- **Global architecture** – Exchange 2000/Active Directory correction clean-up project for 121,000 users in a single forest covering a global environment of 80 independent country domains that had more than 40k errors (i. e.: tombstones, orphans, duplicates and interim accounts) at Deloitte.
- **Awarded Joint Services Commendation Medal** – for classified work on computer representation of non-English non-Cyrillic languages, such as Burmese, Thai and other Bali-Sanskrit derivative languages that made linguists better and more productive at National Security Agency.
